**Hematopoietic Stem Cell Fate Decisions are Regulated by Wnt Antagonists: Comparisons and Current Controversies.**

**Journal:** Exp Hematol

**Publication Year:** 2012

**Authors:** Corey J Cain, Jennifer O Manilay

**PubMed link:** 23022129

**Funding Grants:** Enhancing Survival of Embryonic Stem Cell-Derived Grafts by Induction of Immunological Tolerance

**Public Summary:**

This is a review article that summarizes a body of scientific literature that is focused on how hematopoietic stem cell behavior is affected by the Wnt signaling pathway. This information may be applicable to the study of embryonic stem cell derived hematopoietic stem cells.

**Scientific Abstract:**
